UNITED STATES DEPARTMENT OF AGRICULTURE
Bureau of Entomology and Plant Quarantine
Washington, D. C.

B. E. P. Q.--314, Supplement No. 8 January 21, 1935.

CENTRAL AMERICA
PLANT-QUARANTINE IMPORT RESTRICTIONS
REPUBLIC OF SALVADOR

Decree No. 266 of October 18-19, 1933 (Diario Oficial No. 236, Oct. 26, 1933), imposes certification requirements on plant material offered for entry into the Republic of Salvador. The text of this decree (in translation) follows:

Article 1. The plant material included in the following tariff numbers has been exempted from import duty and consular fees for visaing invoices and shipping papers:

321-1-30-001 Seeds, bulbs, roots, rootstocks, bulbous roots, and shoots, inedible.
321-1-30-002 Cottonseed for planting.

Art. 2. The following notes are inserted:

Note No. 321 (a). Plants and seeds that fall within this chapter and may at the same time serve as food products for consumption, are placed as such in section 2, title 1, chapter 2.

Note No. 321 (b). For the entry of plants and seeds that fall under this chapter, the customs offices of the Republic will require of the interested person a certificate of the corresponding agricultural phytosanitary office, visaed by the Consul of Salvador. The attestation of these documents is free.

If shipments of plants and seeds are not accompanied by the said certificate, the Ministry of Agriculture may order the destruction of plants and seeds which may be imported into Salvador, if in its opinion the said plants and seeds involve danger if propagated; furthermore, the Ministry is authorized to order the fumigation of the same at the expense of the interested persons at any place deemed suitable, if the corresponding certificate is not presented.

Art. 3. The preceding regulations become effective with plants and seeds loaded 30 days after the approval of the present decree, as indicated by the bill of lading.

LEE A. STRONG,
Chief, Bureau of Entomology and Plant Quarantine.
